Corelink Sliding Enclosure - Lite

The CoreLink Lite sliding enclosures features a slide out tray with 4 cable entry points to suit 20mm and 25mm glands. Enclosures come standard with a sliding cable entry bracket.

These enclosures are available in a host of configurations and connector variants with a broad range of adapter plates in both flat and angled, versatile cassette mounting and excellent cable management internally & for entering cables, all combine to offer a tailored solution for your needs.

This enclosure employs either a pair of rotating cable entry brackets or can be configured with a larger angled entry to allow for a range of cable entry configurations.

Applications:
- Splicing of tight buffered or loose-tube cable
- Direct termination of fibre optic cable including quick connects or epoxy field termination
- Patching preterminated cable assemblies

Features and Benefits:
- Rugged powder coated steel construction ensures product durability
- Default faceplates included are 2 x Angled 12 Port, however, a range of faceplate options are available to suit a broad variety of fibre types and adaptor styles.
- Multiple cable entry locations helps ensure the enclosure is suitable for a Left or Right of incoming cable variations
- Adjustable mounting ears allow for a variety of rack positioning options from the front.
- S009:2013 compliant laser warning badge on all enclosures
