

Fibre Optic Pigtails 250u, 600u, 900u, 2mm, 3mm cable options

Fibre optic pigtails offer a convenient method of fibre cable termination. Each individual fibre comes factory terminated with a machine polished, factory tested connector.

atg supply a broad range of pigtails in a variety of connector styles (UPC & APC), pack sizes, fibre modes (SM, OM1, OM3, OM4) as well custom length upon requests.

All pigtails are factory tested and guaranteed.

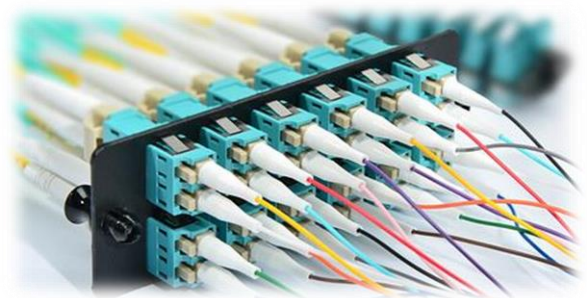

Applications

- All networks including Ethernet, Fast Ethernet, GbE & beyond
- Ideal for a wide range of telecom, datacom, process control and infrastructure networks
- Suitable for repeat handling in enclosures
- CATv, FTTx and MDU networks

Features & Benefits

- Pre-packaged ensuring terminations remain undamaged and untangled during transit (some exclusions apply)
- Easy to strip tight buffer lowers fibre damage or breakage during installation
- Variety of connector types, pack sizes and fibre modes available to match your fibre network
- Standards compliant fibre buffer
- All packages come supplied with test results for each individual fibre termination
- Low smoke zero halogen buffer ensures pigtails are suitable for a range of indoor environments
- RoHS compliant
