OTS500 Optical Talkset

OTS500 Talk Set is optical testing instrument. It is widely used in data networking, testing and maintaining of optical fiber. It can also be used in telecommunication network and cable TV construction.

Application

- Telecommunication networks
- CATV networks
- Other fiber optic networks
- Education and research in optical communication

Features

- Full duplex numeral pronunciation correspondence function
- High quality conversation and low background noise
- Stabilized Light Source
- Low power alarm

Specifications

Parameters	Specification
Wavelength (nm)	1310/1550
Emitter Type	LD
Optical Interface	FC/UPC
Transmission Distance (km)	≤80
Dynamic Range (dBm)	40
Output Power (dBm)	-5 ~ -7
Modulation (Hz)	270, 1K
Output Stability(dB)	± 0.1
Power	3 x AA 1.5V batteries
Power Supply (V)	8.4
Battery Operation Time (h)	5
Dimensions (mm)	196 (L) x 100 (W) x 40 (H)
Weight (g)	600

Standard Package

No.	Name	Unit	Quantity
1	Optical Talkset	set	1
2	Headset	piece	1
3	AA 1.5V Battery	pieces	3
4	Soft Bag	piece	1
5	Power Adapter	piece	1
6	USB Disk	piece	1
