

Sticklers™ Cassette CleanClicker and Cassette CleanClicker™ MT Ferrule End-Face Cleaners

One time use product.

The soft, lint-free ultrasonically cut micro-woven ribbon removes dust and residues without damaging connector end-faces. Sticklers Cassette CleanClicker cleans all standard single fiber connectors including SC duplex, LC duplex, FC, ST and E2000 connectors and the female (no guide pins) MPO connectors.

If cleaning the male MPO guide connector with guide pins a different CleanClicker is needed.

Sticklers Cassette CleanClicker cleans the male (with guide pins) MPO connectors. The backing in the cleaning window is cut to accept the guide pins so the fiber array is being wiped effectively by the cleaning ribbon.

Product Features

- Micro-woven cleaning ribbon provides high absorbency while trapping dust particles
- Lint-free cleaning ribbon
- Manual advance cleaning wheel enables operator to get more cleaning than traditional shutter and trigger-style cassette cleaners
- Disposable cassette cleaner with main body made from anti-static materials
